

Build. Scale. Grow.

The Science Inc.™ Accelerator is a virtual, cohort-based accelerator for early-stage startups in the sciences. Science Inc. helps founders advance their startup toward major goals and move their businesses more quickly toward success.

Over a **4 month period**, you will:

- Achieve critical business milestones with the guidance of expert coaches and business curriculum
- Build a strong network of entrepreneurs, business leaders, and peer founders
- Access the Innovation Space community and coworking space

Upon graduation, you will be on the way to tackling your next business challenge – whether it is fundraising, building a product development process, or another hurdle.

Program Details

Every year, the Science Inc. Accelerator runs two virtual cohorts. One runs February-May and the second cohort runs September-December. Participating in the accelerator is free of charge and involves an approximate 30 hour per month commitment.

Programming includes:

Weekly workshops

with experts - on strategy, operations, fundraising, networking, business development, and more

Weekly 1-on-1 coaching sessions

about goal setting, business planning, and making progress

Pitch preparation

to develop a compelling entrepreneurial story and a powerful pitch

The experience concludes with a virtual pitch showcase to the Innovation Space's investor community and a live Science Inc. Day networking event.

Qualifications

The Science Inc. accelerator is open to life sciences, clean tech, and advanced materials startups who have **developed technological innovation, completed foundational market research, and have started a business plan.** Since Science Inc. is virtual, startups can participate from anywhere.

Life Sciences

Clean Tech

Advanced Materials

Investment Opportunity

The Innovation Space offers Science Inc. participants the additional opportunity to be considered for investment through the Innovation Space's First Fund program. The First Fund provides up to \$240,000 of pre-seed and seed capital. First Fund companies must become residents of the Innovation Space as a condition of the investment. Recommendations for consideration are made at the end of the cohort experience.

What Businesses Are Saying About Science Inc.

Science, Inc. Delivered a fantastic curriculum, expressly designed to help de-risk our deal and ultimately make our company investable!

Jason Winder

Founder, Sonogen Medical, Inc.

Science Inc. has been an incredible accelerant to our organization growth. During this short time we've revamped and bolstered crucial organizational strategies and documentation that will support our long-term success.

Tyler Zanon

Founder, Endoshunt
